Screenshot for AkrutoSync AkrutoSync Free Download Latest Version Setup AkrutoSync is a software utility that offers you direct two-way synchronization of Outlook contacts, calendars, notes and tasks with various Windows and Android portable devices. Two-way synchronization of Outlook contacts The best part of AkrutoSync is that you do not need another application installed on your phone to be able to access Outlook data. To find contacts on your phone after synchronization is very easy because they are placed in the locations you would expect them to be, such as People Hub or the Phone's dialer. AkrutoSync is not limited to perform a one-time transfer of your personal data from Outlook to your mobile device, but allows for automatic bidirectional synchronization between the PC and the Windows phone. This way, you can edit or add contacts either on your phone or your computer Outlook account while always being up-to-date. AkrutoSync does not only that, but is capable of synchronizing multiple telephone numbers per contact, email addresses, birthday dates or contact information. What's more, with AkrutoSync you can also synchronize photos, thus giving you a total synchronization solution for Outlook. Check your Outlook calendar and schedule appointments from your smartphone If you are frequent user of Outlook Calendar, you should know that AkrutoSync enables you to manage your calendar, set appointments and plan new ones from your smartphone. Because the application performs a two-way Outlook data synchronization process between your PC and your mobile phone

#### What's New In?

AkrutoSync is a simple to use, yet powerful, direct Outlook data sync utility that synchronizes your Outlook contacts, calendars, tasks and notes with a Windows PC or Android mobile phone in both directions. Sync your Outlook data to phone, phone to Outlook and your appointments, contacts and calendars to both your phone and PC. AkrutoSync is not limited to perform a one-time transfer of your personal data from Outlook to your mobile device, but allows for automatic bidirectional synchronization between the PC and the Windows phone. This way, you can edit or add contacts either on your phone or your computer Outlook account while always being up-to-date. AkrutoSync does not only that, but is capable of synchronizing multiple telephone numbers per contact, email addresses, birthday dates or contact information. What's more, with AkrutoSync you can also synchronize photos, thus giving you a total synchronization solution for Outlook. Check your Outlook calendar and schedule appointments from your smartphone If you are frequent user of Outlook Calendar, you should know that AkrutoSync enables you to manage your calendar, set appointments and plan new ones from your smartphone. Because the application performs a two-way Outlook data synchronization process between your PC and your mobile phone, any change you make reflects on both your phone and computer. One interesting feature is that AkrutoSync synchronizes all past and future events automatically. Automatic Outlook data synchronizer To conclude, AkrutoSync is a complete Outlook Calendar, Contacts, Tasks and Notes synchronization utility that transfers your data through a SSL-encrypted connection without using the cloud platform. Plus, it features the Synchronization History function, that allows you to track which device modified your data and when, as well as restore deleted information. Unfortunately, it does not include a function to synchronize mails.
