had a problem with this software, most people i've seen that had issues with this r-word have had previous problems with ms office, either with corrupt files or problems with formats of files, but for some reason this seems to be a problem for only someone. but i really don't recommend this program, and when i say this software, i'm NOT saying because of the recovery feature, no because of the rest of the program.

sometimes it just crashes on my computer, and i cant do anything it just says the program is not responding, i have to restart the computer, and when i open the program again it seems that its working but all its doing is recovering files that are not recovered correctly and make a mess of it, and i have no idea how to fix it... this is what happens to me... Since I started using r-word as of now (about 5 months) I found this and other small

problems
