It is a great software for creating images and graphics, but also for editing them. Here are some of the best things to do with Photoshop Elements: Remove Black Bars from Images. Making a black border on your images can create a rather strange effect. Of course it may not look so strange when you are making some white borders, but this is not always the case. So if you want to avoid this you can use Photoshop Elements to easily remove the black bars and make the image look cleaner. Here is what it looks like without any black borders. And here is how it looks with the black border removed. So, how do you use Photoshop Elements to remove the black bars? First of all, open your image you want to edit. Make sure that the file is open in the Editor. Now go to the Enhance menu and click Remove. You will see a small window open up. Make sure that the Black Bars layer is selected. Now you can adjust the borders. Now you can find the Slice tool under the Layers tab. To use the Slice tool you will need to make sure that the image is in the editable area of your image. Now click and drag and you can make a border slice that will help you to remove black bars. After you are done you should have a borderless image. Scaling Your Images in Photoshop Elements. If you have a large image you want to scale, you need to know that not every image can be resized. Have you ever wanted to make your image bigger? Then, here is what you have to do: Open the image you want to resize in Photoshop Elements, and go to the Image menu. Choose Image then Resize. You should see the Select Image window open up. In the top right hand corner you will see the Resize and Crop tool. Click on the resize tool and drag the handles to the size that you want. If you want to crop the image, click on the Crop tool and drag the handles to the size you want. After you are done you should have a resized image. If you have any tips or tricks on how to use Photoshop Elements you want to share, feel free to leave a comment or send me an email. Mask and Remove Objects from an Image. THE STATE OF PLAYSCHOOL (PG) Synopsis: Two teens are drawn by mysterious powers into a world where no one is what they seem. Release Date: 08/22/2015 Cast: Teri Polo, Adam Hagenbuch, Aidan Quinn Director: Alex Kurtzman Starring in Disney's THE STATE OF PLAYSCHOOL Teri Polo, Aidan Quinn and Adam Hagenbuch have signed on to star in a new Disney teen comedy, "The State of Playschool." Roles for three more stars are yet to be cast. Directed by Alex Kurtzman, the story will be set in New York and feature a high-school-set adventure. It's based on a script by Kurtzman and former Disney TV writer and executive producer Craig F. Richburg. Richburg, Kurtzman and Will Speck will produce through their StudioPictures production company. Kurtzman will direct from a script he wrote with Courtney Solomon and Andrew Steele. The producers are also overseeing the project as executive producers. The tale follows two of the school's most popular teens, known as The Plastics, as they run afoul of the law while playing a high-stakes prank. After an attempt to spring them from detention goes wildly awry, they are pulled into an ancient power struggle between two warring factions who seek to control the modern world and restore a bygone age. Polo is playing the Plastics' friend Aimee, while Hagenbuch is Gunther, a complete goofball character. Hagenbuch has a voice role in the upcoming Disney film "The Finest Hours." Quinn is on board as the POTUS. The 75-year-old actor has previously portrayed Commander Edward R. Murrow in "Ferris Bueller's Day Off," the Prince of Sweden in "Enchanted," and Prince John in "Robin Hood." He has also directed six feature films including "The Sandlot," "Eagle Eye," and "Mrs. Doubtfire." He's also known for his roles in "Married to the Mob" and "Magic in the Water." Polo is best known for her role as Carly Shay

Q: Flattening a nested array using foreach I'm trying to flatten an array of nested arrays with no success. I'm sure this is an easy answer for someone. Let me explain what I mean with an example: I would like to flatten an array containing 4 arrays of arrays. Each array contains 2 elements. E.g.: Array ( [0] => Array ( [0] => Array ( [0] => Array ( [0] => test ) [1] => test1 ) [1] => test2 ) [1] => Array ( [0] => Array ( [0] => test3 ) [1] => test4 ) [2] => Array ( [0] => test5 ) [3] => test6 ) I would like to flatten it so it ends up like this: Array (
